MOKS,

If you have a 5 Year Review coming up next year, attached are the ENSV personnel assigned to your site. If you have a question about your site, please contact myself or Mike Berringer.

Thanks,

Clint Sperry

Subject:

Attached is an updated list of ENSV/EAMB technical team assignments for the FY 2014 five-year reviews. I would appreciate it if you would forward this onto your staff as I have received several e-mails from RPMs recently inquiring about ENSV assignments.

Also, the hydrogeologist assignments will change once we get more certainty on whether we can backfill Bill Pedicino's position before the end of the year. For those sites where he is currently the hydrogeologist, it would be beneficial to get started as early as possible so that Bill can complete the technical assessment and hand it off before he retires. If you have any questions, please let me know. Thanks.

Mike Beringer, Chief

Ogallala Groundwater Contamination	B. Gresham	R7		G. McCabe	C. Wooster	D. Nicoski	6/30/2014

Notes:

*COE conducting review under IAG through USEPA HQs.

**FF - Federal Facility is conducting the review.

(D) - In FY 2014, two FYRs are discretionary (Jefferson Barracks Post Dumping Ground and Nebraska Ordnance Plant). These two will be written/prepared by the COE, who is the responsible party for this Federal Facility. These two discretionary FYRs will not go through the regular Region 7 FYR Process since they are discretionary and not required by law.
